

Surgical Day Care Unit

**General Anaesthetic for a Surgical Procedure**

Discharge information for parents and carers

**Introduction**

This leaflet aims to provide you with information about how to care for your child once you are at home.

Most children appear to be alert and active after they are discharged from hospital. However do not be surprised if your child complains of feeling dizzy or being tired. Your child may feel dizzy and uncoordinated for the next couple of days.

**For the next 24 hours**

- **You should** encourage your child to rest
- **You should** make sure your child's activities are supervised by a responsible adult
- **Do not** let your child ride a bike
- **Do not** let your child take part in any outdoor activities
- **Do not** give your child any fizzy drinks
- **Do not** give your child hard to digest foods such as chips, burgers.

Your child may complain of having a sore throat, hoarseness, muscle ache, or pain following an anaesthetic. You can give your child Paracetamol.

**Do not exceed the recommended dosage for your child's age**

All advice regarding medicines will be given to you when your child is discharged.

**What to do if your child starts to vomit**

If your child vomits on the way home or when you get home, do not be alarmed. Do not give your child anything to eat or drink for one hour. After that, you can start giving your child a small amount of water or juice. Then gradually start to increase the amount of fluid you give to your child. Once your child can keep fluids down you can begin to give them a light diet.

**If the vomiting continues, please contact your GP out of hours telephone number or your nearest Accident & Emergency Department.**

## Who to contact if you have any worries

Please contact Surgical Day Care Unit for advice by telephoning:

0151 252 5557 / 0151 282 4509 Monday to Friday 07.00 - 20.00
