

Once we have finished talking or playing I might have to go and wait in the waiting room again for a few moments.

Before I go the adults might need to have a talk about the things I do well and the things that might help me when I find things hard.

Once everyone has finished talking, I can leave and go back home or back to school

Please note: This leaflet only gives general information. You must always discuss the individual treatment of your child with the appropriate member of staff.

Do not rely on this leaflet alone for information about your child's treatment.

My Appointment

I am going to visit Alder Hey Hospital. I might walk, take the bus, take a taxi or go in the car.

When I get there, I will have to wait in a room that looks like this. There will be things to do so I don't get bored waiting.

I will know it's my turn because someone will call my name. Me and the adult I came with will go into a room like this:

They will talk to me and maybe play some games. It is their job to learn all about young people like me.

I will know I am in the right place because the building will look like this:

They will talk to me about my life and all the things I like to do. They will talk to me about things I find easy and things I find hard.

I can ask them questions too.

In the room there will be new people to speak to.
