Subject: Neuro Waiting times

Q1 Please can you tell us the current waiting times for young people being assessed for attention deficit hyperactivity disorder within your local area, e.g. when a young person is referred and how long it will take for them to be seen for an assessment/treatment.

A1 As per clarification received, the average waiting time from referral to a concluded assessment for ADHD at the end of March 2024 is 60 weeks.

Please note this is the time for the completion of the full diagnostic pathway for ADHD, not average wait to first appointment/assessment. The Trust presently starts 100% of ASD and ADHD assessments within 12 weeks of receipt of referral in line with NICE guidance.
