

**Reference Number:** FOIAH2425/199  
**From:** Private Individual  
**Date:** 12 July 2024  
**Subject:** Posology of Enoxaparin

**Q1** In 2023, of all the patients receiving enoxaparin, how many of them followed the posology of receiving injections once a day? And how many received injections twice a day?

**A1** In paediatrics, the recommended dose of enoxaparin is twice a day for most patients.

For how many patients receiving one or two injections a day: Information not held – the Trust does not routinely collate or hold this information centrally as part of its management or performance data. In order to confirm treatment following medication being dispensed, the Trust would be required to access personal data of the individuals and as such the data is exempt under Section 40: Personal data.
